

Julia AMICI_CV

Julia Amici is associate professor at Politecnico di Torino where she teaches Chemistry and Battery systems for automotive and stationary applications. Her expertise ranges from the synthesis and characterization of polymer electrolytes for battery applications, Li-ion and post-Li ion technologies, cell manufacture and modeling and finally, thermal-safety-ageing tests of batteries. She is responsible of two European Project on solid state batteries (Advagen and Sublime), she is a fellowship in Battery2030+ and in WG1 of ETIP Batteries Europe. She co-authored more than 80 peer-reviewed papers published in refereed journals and conference proceedings and co-edited 2 patents in battery and dye sensitized solar cells.
