

Martina CALIANO_CV

Martina Caliano - She has a Ph.D. in Industrial Engineering and a cum laude MSc in Mechanical Engineering from the University of Naples Federico II. She has worked as a research assistant at the University of Calabria and the University of Naples Federico II before joining ENEA as a Research Engineer in 2018 at the Smart Grid and Energy Networks Laboratory. Her research main focuses on thermal energy storage, heat exchange systems, building simulations, and energy optimization. She has published extensively and participated in various European and national projects.
