

Dr. Alexandre Ceccaldi holds a PhD in Biology from Université Pierre et Marie Curie, along with an engineering degree from Agro ParisTech. He has extensive experience in anticancer strategies, industrial management, and innovative design. Since 2015, Dr. Ceccaldi has served as the General Secretary of ETPN, where he coordinates over 130 members from academia, industry, and healthcare to propel nanotechnology advancements in healthcare across Europe. He also led the H2020 NOBEL Project for medical technology convergence and played a key role in the creation of the HealthTech4EU Alliance, Europe's first cross-technology healthcare platform. In 2023, Dr. Ceccaldi was elected Chair of the Strategic Advisory Board of the ERA4Health EU funding program.
