

Danilo CIMADOMO - CV

Danilo Cimadomo is an embryologist and molecular biologist with a PhD in “Morphogenesis and tissue engineering”. He is Director of Innovation in Embryology of IVIRMA Global Research Alliance and Science and Research manager of IVIRMA Italia - Genera. He is Coordinator of the ESHRE special interest group Implantation and Early Pregnancy, Associate Editor of Human Reproduction and Section Editor in Clinical Embryology of Reproductive BioMedicine Online. He has authored >130 papers focused on IVF from basic and clinical science standpoints. He participated to the ESHRE working groups updating the good practice recommendations for embryo biopsy, and for the management of repeated implantation failure in IVF. He coordinates with Professor Maurizio Zuccotti the Master “Biology and Biotechnology of Reproduction: from Research to Clinics” at the University of Pavia.
