

Giovanni ESPOSITO_CV

Innovation Director at Argo Tractors since 2011. Member of the CEMA Technical Board (European Agricultural Machinery Industry Association) in Brussels. He initiated the main R&D projects that the Argo group has developed over last decade, fostering the growth of new projects for the electrification and digitalization of tractors.

Previously, Executive Vice President R&D at Same Deutz-Fahr (SDF), where he worked for 22 years with increasing responsibilities at both the Italian headquarters in Treviglio (BG) and the Lauingen plant in Germany.

Prior to SDF, after graduating in Electronic Engineering from Federico II University in Naples, he worked as electronic engineer at Industrie Face Standard in Milan and later at Philips in Monza. He also participated in an international R&D innovation project at the Philips laboratories in Eindhoven (NL) for one year.
