

Alice Finardi obtained her bachelor degree in physics at the University of Milan and specialized in condensed matter physics during her master degree at Sapienza University of Rome. Now she is a Phd student at the University of Milan and her research is focused on the development of the new time-resolved Raman spectroscopy setup at the SPRINT-NFFA laboratory of CNR-IOM based in Trieste, and the application of this technique to the study of out-of-equilibrium electronic and vibrational properties of quantum materials.
