

## **Brief Biography**

Hi, I'm Klajdi Gega and I graduated from the Bachelor's Degree in Electronic Engineering at Roma Tre University of Rome and the Master's Degree in Biomedical Engineering again at the same university.

Subsequently, I obtained a 2<sup>nd</sup> Level University Master's Degree in "Regenerative Medicine and Tissue Engineering" at University Cattolica del Sacro Cuore of Rome where I also had a 1 year and a half of working experience on field, in particular on nanodelivery experiments.

I currently hold the job position as a research fellow of ITB-CNR at Sapienza University of Rome, working on the project "Generation of individual-specific tissues for the repair of damaged organs (GRENADE)".
