

Giampaolo LACARBONARA_CV

Giampaolo Lacarbonara is a postdoctoral researcher at the Department of Chemistry “Giacomo Ciamician” of the University of Bologna. He got the MSc in Photochemistry and Molecular Materials in 2019 (with honors) and PhD in Nanoscience for Medicine and Environment (Excellent) at the University of Bologna. At the moment he counts 11 published peer-reviewed papers published in refereed journals and 1 book chapter. He participated with an oral presentation to more than 10 conferences in which he got “Best Oral Presentation” award at IWES 2023, Invited Talk at E-MRS 2023, 2023 Doctoral Thesis Award of the Electrochemistry Division of the Italian Chemical Society, and ISE Travel Award with an oral presentation at the 75th ISE Annual meeting in Montreal. He worked under the Program Agreement with ENEA 2019-2021, in the H2020 CUBER Project and in the EIT Raw Materials CO2Carbon Project. He is now working in the program agreement with ENEA PTR2022-2024, as co-PI in the WP2 of ECOSISTER project, and in a PRIN2022 project
