

Anita MAIENZA - CV

Dr. Anita Maienza, Environmental Biologist, graduated from Sapienza University of Rome in 2008 with a thesis in chemistry and environmental ecotoxicology and earned her PhD in Forest Ecology (with a focus on soil) from the University of Tuscia in 2012. Since July 2019, she has been a confirmed researcher and, since 2021, a lecturer in soil management and fertility at the University of Brescia. Her primary interest is in studying the biological quality of soil ecosystems in various environmental contexts (urban, agronomic, natural) and in relation to sustainable management practices (biochar, smart crops, agroecology). She has active collaborations in Italy and abroad, co-supervises several theses, and regularly conducts supplementary seminars for university courses.
