

Aurora MANGOLINI - CV

Aurora Mangolini received her Master's Degree in Biotechnology in Medicine at the University of Milano Bicocca in March 2023. She made her experimental thesis at the Laboratory of Nanomedicine and Clinical Biophotonics (LABION, Fondazione Don Carlo Gnocchi, Milan) focusing on the role of serum extracellular vesicles as potential biomarker of rehabilitation after cerebral stroke. Currently, she is working at LABION on the same project and on ENEA (Exercise aNd hEArt transplant) project, a randomized controlled trial whose general aim is the comparison in terms of safety and efficacy of cardiac telerehabilitation and onsite rehabilitation in patients who undergo heart transplantation.
