

Giuseppina Pace is a staff researcher at the Institute of Microelectronics and Microsystems of the National Research Council (IMM-CNR) since 2019. She graduated from the University of Rome Tor Vergata and received her doctorate from the Louis Pasteur University of Strasbourg (France). She then continued her research work at the University of Cambridge (UK) as a post-doc, before returning to Italy in 2012 to work at the Italian Institute of Technology. She has long experience in the multidisciplinary field of organic and flexible experimental electronics and energy harvesters. Her work mainly focuses on the different aspects related to materials and devices physical-chemistry and to the engineering of sustainable electronic devices.
