

Dr. Virgilio Piccolo accomplished a master's degree in pharmacy at University of Naples Federico II in 2023. After graduation, he started to work in the field of Gene therapy by winning fellowship research working on the development of nanoplatforms for RNA delivery to the lungs and, successively, he worked on the production of polymeric nanoparticles for the delivery of RNA to solid tumors. On November 2024, he will become a PhD student in "RNA Therapeutics and Gene Therapy" at the Department of Pharmacy of University of Naples Federico II.
