

## **CV Stellino**

Elena Stellino is a researcher at the department of Basic and Applied Sciences for Engineering at the Sapienza University of Rome. She graduated in Physics in Rome and got her PhD at the University of Perugia in 2021. Her research field is the Solid State Physics investigated from the experimental point of view. Her activity has focused on the study of low-dimensional materials by optical spectroscopies (Raman, photoluminescence and infrared) often coupled with high-pressure techniques, carried out both at in-house and large-scale facilities.
