

Marco Taddei is Associate Professor of General and Inorganic Chemistry at the University of Pisa since 2023. Prior to this appointment he worked at the University of Perugia, the University of California San Diego (US), Paul Scherrer Institute (CH) and Swansea University (UK). His research is focused on the synthesis, structural characterisation and adsorption properties of metal-organic framework sorbents for CO₂ capture. He is the author of more than 50 publications in international peer-reviewed Journals and three book chapters. He is co-founder and scientific advisor of novoMOF, a Swiss-based company that manufactures and commercialises metal-organic frameworks. His work was featured in the 2019 Emerging Investigators Themed Issue of the Journal of Materials Chemistry A. In 2022, he was the recipient of both the Nasini Medal of the Inorganic Chemistry Division of the Italian Chemical Society and the Nardelli Prize of the Italian Crystallographic Association.
